

# MATESAVER

**Man overboard rescue pole that facilitates the easy and rapid recovery of casualties from an overboard situation even when unconscious. The unique design allows for a single person to perform a rescue whilst on deck of vessel.**

Used by Associated British Ports (ABP), the Royal National Lifeboat Institution (RNLI), and the Maritime and Coastguard Agency (MCA) in the UK, as well as other international port authorities.

## Key features

- Weight: 6kg
- Available lengths: 2.6m & 3.6m
- Safe Working Load: 150Kg
- Minimum Breaking load: 1500Kg
- Inspection: Every 6 months and after each use
- Lifespan: 5 years
