

JON BUOY RECOVERY MODULE MK 6

The Jon Buoy Recovery Module MK6 is a full man overboard solution enabling deployment of a device that can locate, support and recover a MOB. It is accepted as a direct replacement for one traditional danbuoy, horseshoe, drogue, light and whistle, specified within the World Sailing Offshore Special Regulations, where two would normally be required.

When operated, the JBRM6 deploys directly from its container/valise, inflating automatically, immediately providing a high visibility safe haven. This supports the casualty comfortably out of the water, reducing the risk of hypothermia whilst awaiting recovery. The MOB is recovered horizontally, particularly important with a possibly hypothermic casualty and reducing the chance of complications or cardiac arrest during recovery.

Key features

- Compact & lightweight
- Automatic inflation
- Tailored buoyancy design
- SOLAS automatic light
- Intuitive boarding assistance
- Integrated water stability system
- Lifting harness
- SWL of 200kg
- Retro-reflective binding
- 5m throwing quoit & line
- AIS attachment point

Valise only

- Bulkhead mounting option*
- Aesthetic slimline soft case, available in orange or white
- Heavy duty PVC soft case
- 3 year service interval

*Can be removed and stored when not in use.

Container only

- Single action deployment
- Aesthetic slimline container
- Container available in white, black carbon style or customised container finish*
- 2 year service intervals

* Customised container finish by special order only.
